

Regular Slotted & Half Slotted Containers (RSC & HSC)

*Versatile. Affordable.
Environmentally Friendly.*

*Imagine an economical
alternative to traditional
cardboard or paper boxes...*

The RSC/HSC Advantage

These corrugated plastic containers are **lightweight, strong and versatile**, making them the preferred choice for distribution, transport and storage applications.

- Economical
- Long-term reusability
- Environmentally friendly
- Water resistant
- Multiple sizes & styles

Corrugated Plastic Solutions

RSC and HSC containers can be used for a variety of business and consumer applications.

- Packaging
- Warehousing/Material Handling
- Moving/Storage
- Mail Rooms
- Agricultural
- Manufacturing
- Medical
- Grocery
- Retail
- Schools/Universities
- Recycling

Environmentally Friendly

When you purchase MDI products you are not only improving the lives of people with disabilities, you are also helping the environment.

Our corrugated plastic products are 100% recyclable and made from 50% post industrial material.

MDI[®]
Minnesota Diversified Industries

AbilityOne
PROGRAM ★

Our capabilities
are many.
Our dedication
is strong.

Since 1964 Minnesota Diversified Industries (MDI) has been *servicing people with disabilities by offering progressive development and employment opportunities in competitive business enterprises*. Real jobs that create a sense of pride, value and independence in our workers' lives.

To support this mission, MDI has focused on providing customer solutions that maximize your business. MDI tailors deliverables to meet the unique requirements of each customer. From corrugated plastic products to assembly, production, packaging and project/client-specific services, MDI is your answer.

Unsurpassed Quality

MDI uses only the highest quality plastic for its products. High Density Polyethylene (HDPE) gives our plastic its outstanding strength and durability. MDI's water resistant corrugated plastic maintains physical integrity against breakage, cracking and deterioration.

HDPE's strength and flexibility allows multiple uses in most applications, which drives down cost when compared to paper, cardboard or other plastic products. Plus, HDPE is classified as a #2 recyclable product that is universally accepted for recycling.

MDI's proprietary blend of HDPE with Linear-Low Density Polyethylene (LLDPE) delivers an excellent gripping capability. This keeps containers from slipping in transfer or on belts.

Standard Colors Available

- Red
- Yellow
- Blue
- Natural
- Green

Custom-Built Containers

MDI can adjust container design, color and specifications to fit your unique needs.

Corrugated Plastic Specifications

Test	Outcome
Density	.941 gr/cm ³
Wall Thickness	.0075"
